

# Duraklick ReKlick

Thoughtful. Simple. Safe.

## Lever Tool

The SOLTOP Duraklick ReKlick is a specially designed lever tool for the easy, safe, and material-friendly removal of clipped-in SOLTOP Duraklick supports from floor rails.

### Operation

1 Position your foot on the floor rail next to the support to be removed. Place the ReKlick on the opposite side of the support and engage it with the floor rail so that both the driver and the lower end of the lever are securely seated in the rail.

2 Press the ReKlick lever downward in a controlled manner.

3 The support can now be removed from the floor rail easily and with minimal effort.

4 Raise the ReKlick lever back to its original position. This returns the floor rail to its initial state. Remove the ReKlick from the rail. The support can then be clipped back into the floor rail if required.
