

The simple in-roof solar system for fast-track projects

SwissSolarRoof Easy is designed around pre-configured module arrays for the fast and cost-effective implementation of photovoltaic projects. The system has been developed to deliver simple roof installations efficiently and economically.

Thanks to its standardised module sizes, SwissSolarRoof Easy is ideally suited for projects with clearly defined requirements and short implementation times. The system simplifies planning, enables efficient installation, and provides an attractive solution for cost-conscious photovoltaic projects.
